Release September 2000

the power of colours - flowerpower. when the night is deep, presumed frames could be the presented content of this bruchstuecke release. on the search for an answer, that's why the basic loops were taken from a rio reiser lp.

vermittelnde-elemente aka robert aberle picks up layers of effects and arranges them new. he reflects past in presence, starts within the same loop as the one, everything ends. flower as a homage.
